

LAWRENCE P. DAVIS, MD FACR

APDR PRESIDENT 2010-2011

It was an honor and a privilege to be APDR President from 2010–2011. I had huge shoes to fill. During this year, APDR conducted a needs assessment of its committee structure, especially the ad hoc committees and liaison positions. Because of the data received, the Board disbanded several ad hoc committees. The Board added the AMSER liaison position and changed the Electronic Communications committee from an hoc to a standing committee.

APDR worked to strengthen its relationship with the other major radiology organizations. APDR's program directors were tapped to engage with the other organizations. APDR strengthened its relationship with the Radiology RRC.

Finally the APDR mentorship program was initiated to help new program directors feel comfortable in their role.
